

ACCV 2020 Author Response Template

After receiving the reviews, authors may optionally submit an Author Response PDF via the “Post Author Feedback” link on CMT to address the reviewers’ comments, which will be limited to a one page PDF file using this “ACCV 2020 Author Response Template” (this file). This is also called a “rebuttal.” See the Rebuttal Instructions in the Paper Author Guidelines at <http://accv2020.kyoto/submission/author-guidelines/>.

Please note that we will be strongly enforcing our rebuttal policy, which is as follows:

- The Author Response must maintain anonymity and cannot include external links that reveal the authors’ identity or circumvent the length restriction.
- **Responses longer than one page will simply be ignored.** This includes responses where the margins and formatting are deemed to have been significantly altered from those specified by the style guide.
- The Author Response is optional and is meant to provide you with an opportunity to rebut factual errors or to supply the additional information requested by the reviewers. It is NOT intended to add new contributions (theorems, algorithms, experiments) that were absent in the original submission and NOT specifically requested by the reviewers. You may optionally add a figure, graph, or proof to your Author Response to better illustrate your answer to the reviewers’ comments.
- Reviewers should not request excessive additional experiments for the Author Response or penalize for lack of such additional experiments. What constitutes excessive is ultimately decided by the Area Chair.
